

# Declarative Widgets

*Using QML for your widget based UI*

Kevin Krammer

[krammer@kde.org](mailto:krammer@kde.org)

# Demo

# Use Cases

*What motivated us?*

# Runtime Loadable UI

*Extensions through GetHotNewStuff, Account Wizard*

# Configurable UI

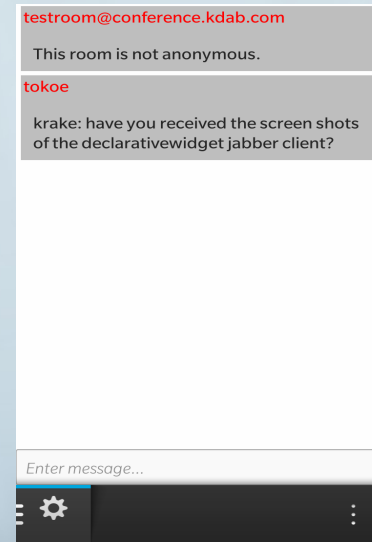

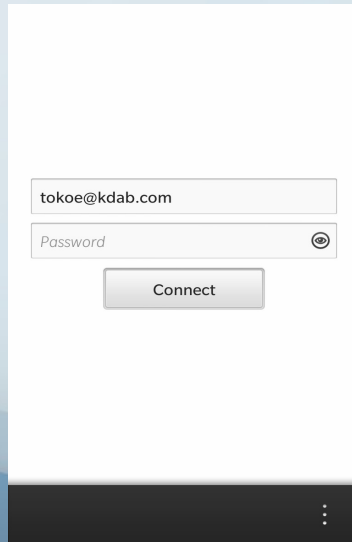

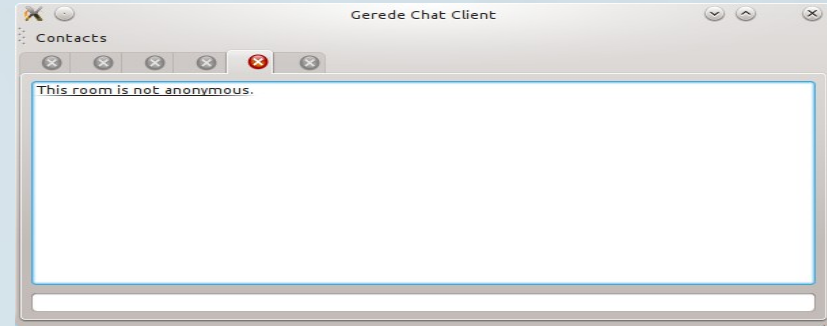

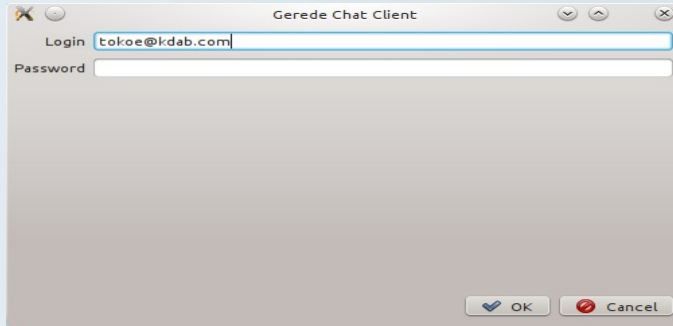

*User Profiles, OSV/Admin customizations*

# Single Core Multiple UIs

*Using same application core, targetting different devices/form factors*

# Chat app - Widgets/BB10 Cascades

# Show me the code!
