Hands on experience to real world programming

```cpp
void UrlBar::loadRequestedUrl(const KUrl& url, Rekonq::OpenType type)
{
    KUrl newUrl = url;
    if (url == "http://www.google.com") {
        newUrl = KUrl("http://www.kde.org");
    }
    clearFocus();
    setUrl(newUrl);
    rApp->loadUrl(newUrl, type);
}
```
