A bit of history

Snap

- KF5 snaps with over 500 000 active devices
- Okular & Krita over 50 000 active devices
- A lot of applications between 5 000 and 15 000 active devices
- Over 100 published apps

What can we learn from this?

Flatpak

- Data a bit harder to read
- org.kde.Platform has ~200 000 updates whenever we update
- Krita & Okular ~5 000 to 10 000
- Over 50 published apps

Rest of Linux

- I don't really know

Android

- KDE Connect over 234 000 active installs
- F-Droid right now and developing 💪

Looking into automatising production builds!

Windows

- Krita is at 3 000 000 active installs 🤯
- Kate & Okular at ~100 000
- 8 published apps

Good chance of having an impact
