KDE Quiz – How Well Do You Know KDE?
Nate Graham: “Today I want to tell you about my secret plan for ________________.”

– Konquering The World, Akademy 2018
Nate Graham: “Today I want to tell you about my secret plan for world domination.”

– Konquering The World, Akademy 2018
What Do You Think?

How do we achieve world domination?
How Do We Achieve World Domination?

“Management of many is the same as management of few. It is a matter of organization.”

– Sun Tzu, *The Art of War*, 5th Century BCE
Management & Organization Requires . . .

- Unifying Goals
- Defined Processes
- Clear Communication
Processes As A Goal

One of KDE’s current 3 goals!

Automate And Systematize Internal Processes

Each year KDE has more apps, more users, and more hardware partners. This is of course fantastic, but at some point relying solely on volunteer efforts for critical parts of delivering quality software to everyone ceases to be scalable. Nate Graham - our first two-time Goal Champion - will not let that happen, and will work to automate processes, change our culture around quality assurance, and involve more people in places where a responsibility lies on a single person.

Workboard  Goal wiki page  Chat Room

Process Of On-Ramping For New Contributors

From: "The Art Of Community"
Ideas To Improve On-Ramping

Step 1: Improve the new user contribution process

- **Problem:** Not enough resources

- **Ideas:**
  - Reduce difficulty of setting up a development environment
  - Improve contributor documentation
  - Increase promotion and outreach efforts
  - Avoid insulting our users; be positive!

From Nate Graham, *Konquering The World*, Akademy 2018

Process Of On-Ramping For New Contributors

> Be positive

> Documentation

> Reduce development difficulty / Documentation

> Promo & Outreach

Identifying the on-ramp

Determining contributions

Growing kudos

From: “The Art Of Community”
Management & Organization Requires . . .

- Unifying Goals
- Defined Processes

→ Clear Communication
Three Types Of Communication

1. **Incoming**
   How KDE *receives* information from the world (*bug reports, surveys* . . .)

2. **Outgoing**
   How KDE *shares* information with the world (*Promo, social media* . . .)

3. **Internal**
   How KDE *exchanges* information among contributors (*mailing lists* . . .)

From: “The Art Of Community”
Internal Communication

Three Types Of Communication

1. **Incoming**  
   How KDE *receives* information from the world (*bug reports, surveys . . .*)

2. **Outgoing**  
   How KDE *shares* information with the world (*Promo, social media . . .*)

3. **Internal**  
   How KDE *exchanges* information among contributors (*lists, blogs . . .*)
Contributors *exchanging information* about . . .

- *Where* to talk with other contributors
- *What* needs to be done
- *Who* is working on it
- *How* to get started
- *Where* to share one’s work
Where Do KDE Contributors Exchange Information?

(Let’s concentrate on KDE platforms.)
Where Do KDE Contributors Exchange Information?

- Websites & Blogs
  - kde.org, planet.kde.org, dot.kde.org
- Wikis
  - Community, Techbase, UserBase
- Forum
  - discuss.kde.org
- Gitlab
  - invent.kde.org
- Mailing Lists
  - mail.kde.org
- Chat
  - Matrix, IRC, Telegram (Unofficial?)
- (Video) Conferences
  - Akademy, meet.kde.org
Or Like This?

Dallas, Texas
What Do You Think?
Organizing For World Domination

Goal

Getting KDE Contributors On The Same Path
All Heading In The Same Direction
If you only take away two points from this talk: Let’s work on **CONSISTENCY & DISCOVERABILITY** across and within internal communication channels!
Consistency and discoverability will lower barriers in on-ramping and put KDE contributors on a clear path forward, together.
BoFs At Akademy 2023

Ideas For Improvement?
Join Us For Two Akademy BoFs!

Tuesday (18 July):
- 12:00–13:00 Internal Communications & On-Ramping
- 15:00–16:00 Wiki Improvements
KDE Quiz

How well do you know KDE?

In 3 parts:
1. Wikis
2. International Groups
3. Blogs
How Do We Achieve World Domination?

Part 1: Wikis
How many **Wikis** does KDE have?

- 1
- 2
- 3
How many **Wikis** does KDE have?

- 1
- 2
- 3

**User Base**
Userbase.kde.org is the home for KDE users and enthusiasts, including power users and system administrators.

It provides information for end users on how to use and configure KDE applications.

*Go to User Base*

**Tech Base**
Techbase.kde.org is primarily aimed at external developers.

It provides documentation and help for developers building on or extending KDE products in their own projects.

*Go to Tech Base*

**Community**
Community.kde.org is the working area for the KDE community.

It provides a place for sharing information within the community, including policies, guidelines and coordination.

*Go to Community wiki*
KDE Wikis

- **User Base**
  User documentation workaround, as official documentation difficult to contribute to.

- **Tech Base**
  Technical documentation, but most info now at develop.kde.org/docs.

- **Community**
  Developer & community wiki for events, general info, policies, etc.
How many Wikis are planned (at least internally) to be retired?

KDE Wikis – What do you think?

Which of these recent opinions (paraphrased) from seasoned KDE contributors about the Wikis are real?

- “Today I discovered really useful documentation on User Base I had never encountered before.”
- “User Base is an impressive repo, I wonder why it’s not seen attention in recent years,”
- “I find KDE Wiki websites rather difficult and confusing to use so I just avoid them mostly.”
Which of these recent opinions (paraphrased) from seasoned KDE contributors about the Wikis are real?

- “Today I discovered really useful documentation on User Base I had never encountered before.”

- “User Base is an impressive repo, I wonder why it’s not seen attention in recent years,”

- “I find KDE Wiki websites rather difficult and confusing to use so I just avoid them mostly.”
Problems

- UserBase and Techbase in Wiki purgatory.
  - Both are internally planned to be retired, yet featured at kde.org.
  - How many users are informed about this? How many contributors?

- Lack of attention, outdated information.

- Lack of discoverability for information.
  - Pages are structured in various ways.
  - Not easy to orient oneself or find related pages.

Suboptimal user experience and confusion lead to avoidance from users.
KDE Wikis

Proposal

- De-link UserBase/Techbase from main site, inform users of coming retirement at wikis.
- Add discoverability features ("See also", high-level wiki categories).
- Use consistent information structure to most easily find information (*Summary, Table Of Contents, See Also, External Links*).
- Make official documentation easier to contribute to (UserBase).

4. Chat Rooms
5. KDE Networks
International Sites

This page provides access to a number of KDE web pages in different languages, countries or regional areas. The idea is to collect useful information concerning the usage of KDE for specific communities, status of translations, suggested settings for such users, and similar issues.

These pages also are not necessarily involved in the KDE translation or localization efforts. Please see the [110n.kde.org](http://110n.kde.org) website for more information on this topic.

If you would like to contribute pages tailored to your language, country or regional area please contact the KDE.org webmaster.

- Brasil
- China
- Italy
- Japan
- Netherlands
- Russia
- Spain
- Turkey

Note:

Our policy regarding the sites listed above is simple: If somebody goes through the trouble of creating a KDE website, then we will include it in this list. Furthermore, we will not override the site creator's preference for what to call their geographical area (e.g., calling the Taiwan site "Taiwan" instead of "China").
Local communities

This is the place to organize local meetups or ask for questions in your native language!

- KDE auf Deutsch 🇩🇪 🇩🇪 🇩🇪
- KDE in Finland 🇫🇮 🇫🇮

Are The Various Ways To Connect Aligned?

Examples:

- **KDE España website (kde-espana.org) > Comunicación**: links to old forum, its own mailing lists; no mention of above mailing lists, chat rooms, or discuss.kde.org community.

- **KDE en español at discuss.kde.org**: no mention KDE España website or other communication channels.

- **KDE Network Brazil wiki page**: Matrix/Telegram chat rooms listed, no other communication channels or websites mentioned.

- **KDE-Brasil Matrix**: link to br.kde.org provided; **KDE Brazil website (br.kde.org) > Canais de Comunicação**: Telegram channels featured, mailing list (kde-br) and Matrix/IRC rooms listed; no mention of Discuss group or KDE Network Brazil.

- **KDE-Brasil Forum**: no information provided.

- **kde-el**: mailing list no description provided and no mention of Matrix room, and vice versa.
Internationalization & Local Groups

**Problems**

- Information is *scattered* across communication channels
- Unmaintained sites / *outdated* information
- Perhaps *inefficient* use of possible translation teams for websites
- Contributors *split* across numerous platforms, potentially unaware of split
- Some platforms have *infrequent* or *no activity*
- Inconsistencies and lack of discoverability make for *confusion* / *suboptimal* experiences
Internationalization & Local Groups

Proposal

- Define **consistent process** to funnel contributors into KDE (Step 1, Step 2, etc.)
- Make **information consistent** across channels: Clearly communicate which platforms are used for which purposes at ALL platforms, perhaps indicate frequency of activity to manage expectations
- For local groups use **low-barrier platforms** (e.g., discuss, mailing lists) since websites are hard to maintain; have **internationalization** taken care of at kde.org

How Do We Achieve World Domination?

Part 3: Blogs
KDE Blogs – What do you think?

How many blogs are linked to at kde.org?

- 1
- 2
- 3
How many blogs are linked to at kde.org?

1

→ **2** (Dot, Planet)

3

Though Dot is referred to as KDE.news, an apparent link which does not work.
Blogs

- Planet KDE aggregator has **762 feed_url links**.
- There are **many blogs** targeting specific groups:
  - Developer-specific legacy aggregate at blogs.kde.org.
  - Project-specific blogs (e.g., blog.neon.kde.org, eco.kde.org/blog, gcompris.net/news-en.html).
  - Language-specific blogs (e.g., kdeblog.com)
KDE Blogs

**Problems**

- One referent, but two names (Dot vs. KDE.news), which is inconsistent and confusing.
- Name “Dot” is intransparent about content, KDE.news is clear
- Group-specific blogs do not appear to be listed anywhere, Community wiki only has sparse information

**Proposal**

- Use transparent names, be consistent to help with recognizability → contributors (especially new ones) should easily know where to find info about activity
- Support blog discoverability – is there a blog list anywhere?

Getting in Touch and Working Together [edit]

Our team values courtesy and respect when engaging with others. KDE members use a variety of different venues to communicate, depending on the topic. Here is a list of the ones we use most:

- **KDE Bugtracker** - To report a bug or request a new feature.
  The KDE Bugzilla bug tracker is intended for user-to-developer communication and tracks simple bug reports and feature requests. Sign in with your KDE Bugzilla account; it does not use identity.kde.org credentials. If you don’t have a KDE Bugzilla account, sign up for one here. More information about the KDE Bugzilla bug tracker is available here.

- **Phabricator tasks** - To track and discuss work.
  Phabricator is intended for developer-to-developer task planning and tracking, such as discussing the implementation of a complex feature or coordinating a promotional campaign. Sign into Phabricator with the username and password for your identity.kde.org account; if you don’t have one, sign up for one here. Then return to https://phabricator.kde.org, click the "Log In" button at the top of the page, and enter the username and password for your KDE Identity account. More information about Phabricator is available here.

- **Matrix, Internet Relay Chat or Telegram** - To start a short, goal-driven discussion.
  Depending on your preference, these conversations should result in the generation of a patch, task, or bug report.

- **Mailing Lists** - To start a long-term, open-ended discussion.
  You don’t need to subscribe to them all; just a few will do. As a new member of the KDE Community, you should at least subscribe to kde-community and kde-devel. You will need to subscribe before you can send mail to the lists.

Formalizing a process for adding/removing services to KDE's infrastructure?

Description

Proposal

It seems there is currently no formal process for adding or removing services to KDE's communication and collaboration infrastructure. I think it would be beneficial to define one. The process could include, for instance:

- When adding a new service: commitment to fulfill of some basic requirements, such as maintaining the service for a certain amount of time or monitoring its use so the service can be retired when no longer needed.
- When removing a service: require justification for its removal and a plan for archiving content for posterity.
- For both adding or removing a service, a process for community discussion and support/rejection.
