KGOALS

KDE is a large and diverse community working on hundreds of projects. Every two years, we vote on three overarching goals to direct our efforts. This cycle's focus is to improve user experience for input devices, support developers, and foster community growth.

Streamlined Application Development Experience

This goal focuses on improving the application development process. By making it easier for developers to create applications, KDE hopes to attract more contributors and deliver better software for both first-party and third-party applications. A notable task within this goal is enhancing the experience of building KDE apps with languages beyond C++, such as Rust or Python.

Champions: Nicolas Fella and Nate Graham

[Workboard](#)[Chat](#)[Proposal](#)

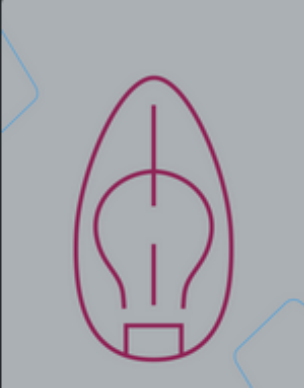

We Care About Your Input

KDE has a diverse users base with unique input needs: artists using complex monitor and drawing tablet setups; gamers with controllers, fancy mice, and handhelds; users requiring accessibility features or using a language optimally types with complex input methods; students with laptops, 2-in-1s, and tablets — and more! While KDE has made significant progress in supporting these diverse sources of input input over the years, there are still gaps to be addressed. This goal aims to close those gaps and deliver a truly seamless input experience for everyone.

Champions: Gernot Schiller, Jakob Petsovits and Joshua Goins

[Workboard](#)[Chat](#)[Proposal](#)

KDE Needs You!

KDE's growth depends on new contributors, but a lack of fresh involvement in key projects like Plasma, Kdenlive, Krita, GCompris, and others is a concern. This goal focuses on formalizing and enhancing recruitment processes, not just for individuals but also for institutions. Ensuring that bringing in new talent becomes a continuous and community-wide priority, vital for KDE's long-term sustainability.

Champions: Aniga Khokhar, Johnny Jazeix and Paul Brown

KDE GOALS

#kdegoals

KDE

@kde@floss.social

We've been working on improving On-Screen Keyboard support in computers, mobile devices and TVs as part of the We Care About Your Input - KDE Goals initiative.

Check out what has been done so far in Plasma Virtual Keyboard and tell us what you'd like to see next.

KDE

@kde@floss.social

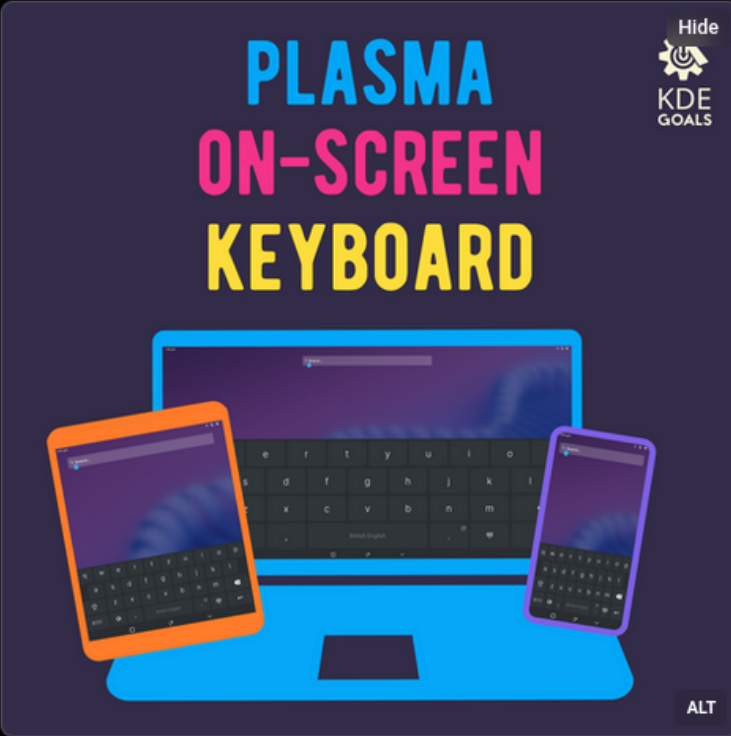

KDE devs have been quietly working on Plasma Keyboard, a new on-screen keyboard for desktop and mobile part of the "We Care About Your Input" KDE Goals initiative. Although not ready for texting yet, it has been making progress. Hopefully it'll be in a screen near you soon. Join the effort!

Tablet improvements

295

KDE

@kde@floss.social

Do you use a drawing tablet with Linux? You can share your device info in two easy steps - no coding skills required! ❤️

Help KDE devs like [@redstrate](#) build driver support.

Plasma 6.4

199

KDE

@kde@floss.social

Plasma 6.4 is out and it's' more welcoming than ever!

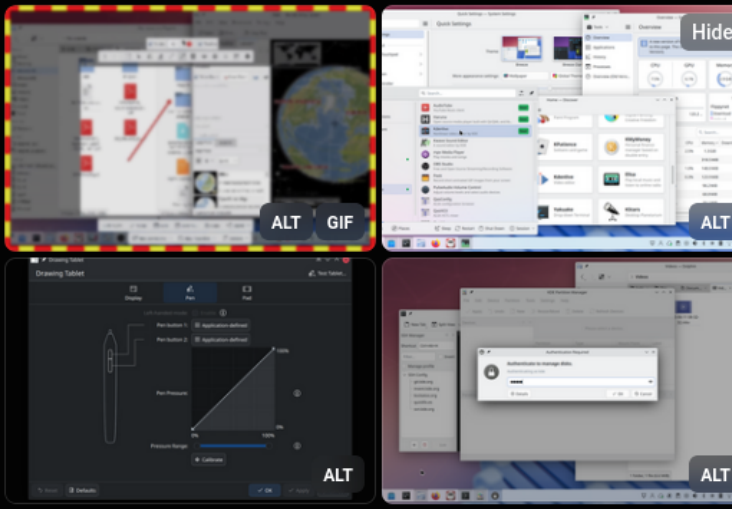

[kde.org/announcements/plasma/6...](#)

Check out the tweaked tiling that lets you have different layouts for every virtual desktop; the overhauled Spectacle that makes capturing your desktop faster; how KRunner now understands color; and in general the literally dozens of other fixes and features that make Plasma friendlier and easier to use.

INTEGRATION

Our goals are
transversal

Documentation

- Tutorials
- develop.kde.org
- qmlonline.kde.org

Bindings

- Grow community (Python and Rust)
- Mentorship programs

INSTALL FEST

11 Sept | 16:00 - 20:00

TALKS

- 6 Sept | 17:00 - 18:00 KDE Goals - One year recap
- 6 Sept | 18:00 - 18:40 Language Bindings: The future of KDE?
- 7 Sept | 15:35 - 16:15 Next-gen documentation infrastructure for KDE
- 7 Sept | 17:10 - 17:50 Bridging the Gap: Artists and Wayland

WORKSHOPS

- 8 Sept | 15:00 - 17:55 KDE Stack Overview
- 9 Sept | 16:00 - 16:55 Rust Bindings Workshop

BoFs

- 8 Sept | 15:00 - 15:55 Plasma Virtual Keyboard
- 8 Sept | 16:00 - 16:55 General Input topics
- 8 Sept | 17:00 - 17:55 KDE Needs You

Streamlined Application Development Experience

Goal Statements

Have nice things

Vision and Design

What do we actually
want?

Vision and Design

- Settle on a target design for applications
- Consistency
- Convergence
- Simple by default, powerful when needed

Development

Let's do it!

Development

- Extend, simplify, and streamline API ecosystem
- Doing it right should be easy
- Allow different languages
- Have good tooling

Documentation

How does any of
this even work?

Documentation

- Improve documentation for all aspects of application development
- HIG & Design
- API documentation
- Tutorials
- Debugging
- Publishing

Community

Let's do this
together?

Community

- Go alone go fast, go together go further
- Embrace community for development, QA, promo, ...
- Work with our neighbors: Qt, XDG, Portals, Flatpak, Distro, ...

Now

What have we achieved?

Vision and Design

- Nothing specific in terms of grand vision
- Technical work on Design System and Union
- Wanted: Application Design Sprint

Development

- Main focus: Language bindings for Rust and Python
- Building blocks for apps in other languages
- Various API improvements across the board (e.g. KirigamiApp)
- Improvements in QML tooling
- More extensive CI verification
- Missing: People using new language bindings

Documentation

- Main focus: new api.kde.org
- New and improved tutorials on develop.kde.org
- Missing: Update old documentation
- Missing: Fill missing content
- Wanted: One-page landing page for full app dev cycle

Community

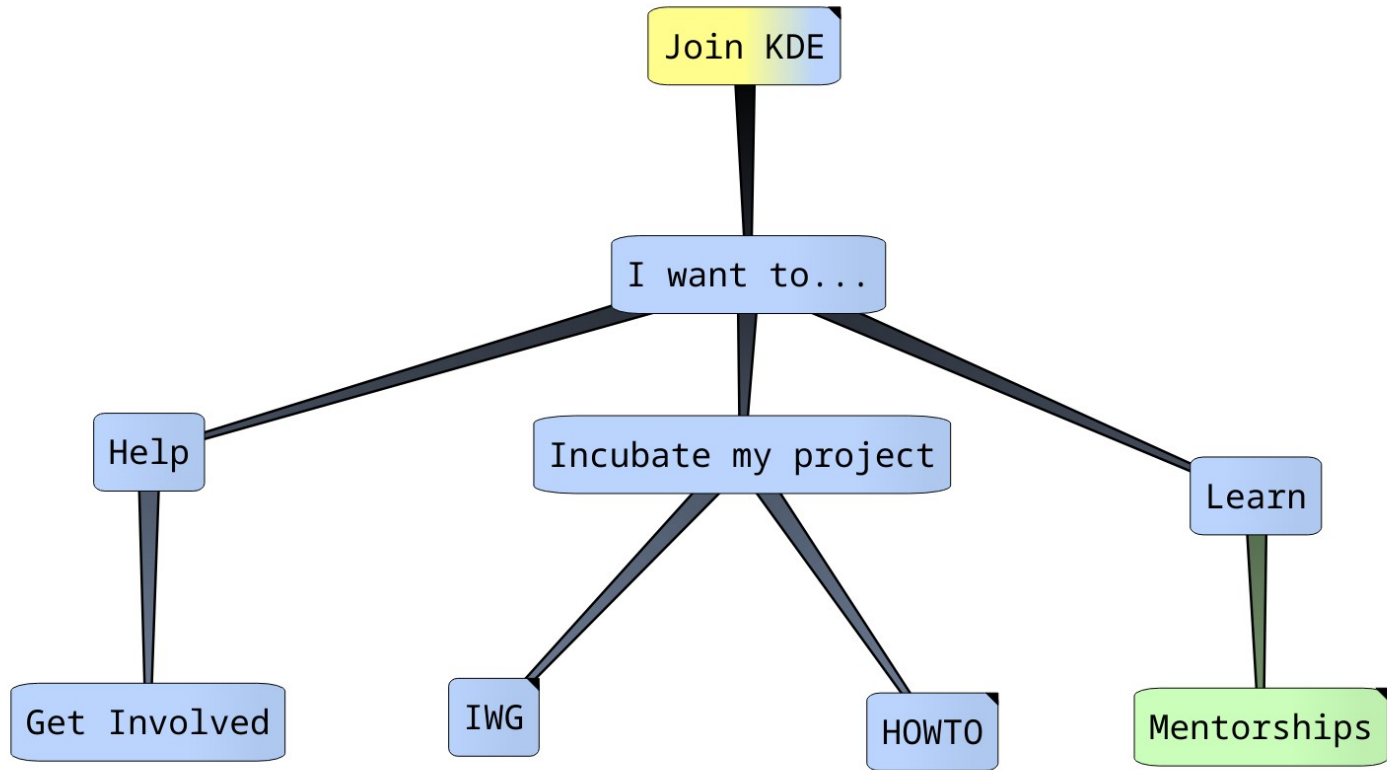

- Our community is awesome as ever
- Welcome and guide new people
- Extend outward: Qt, portals, systemd, ...
- Attend Events: Qt Contributor Summit, LAS, Oxidize, All Systems Go, ...
- Enjoy Akademy

KDE MENTORSHIP

JOINING THE KDE COMMUNITY

KDE helps newcomers to introduce themselves in the opensource world. Through several programs, such as Season of KDE or Google Summer of Code, people can join KDE, improve the different softwares while being mentored by some of the best developers in the world!

**WE CARE ABOUT
YOUR INPUT**

GOAL PROPOSAL & TOC

- Drawing Tablet
- Mouse and Touchpad
- Keyboard
- Virtual Keyboard
- Better IME support
- Game Controllers
- Miscellaneous

DRAWING TABLET

Status:

Merged upstream - a few more features coming

Shoutout:

Joshua Goins, Nicolas Fella

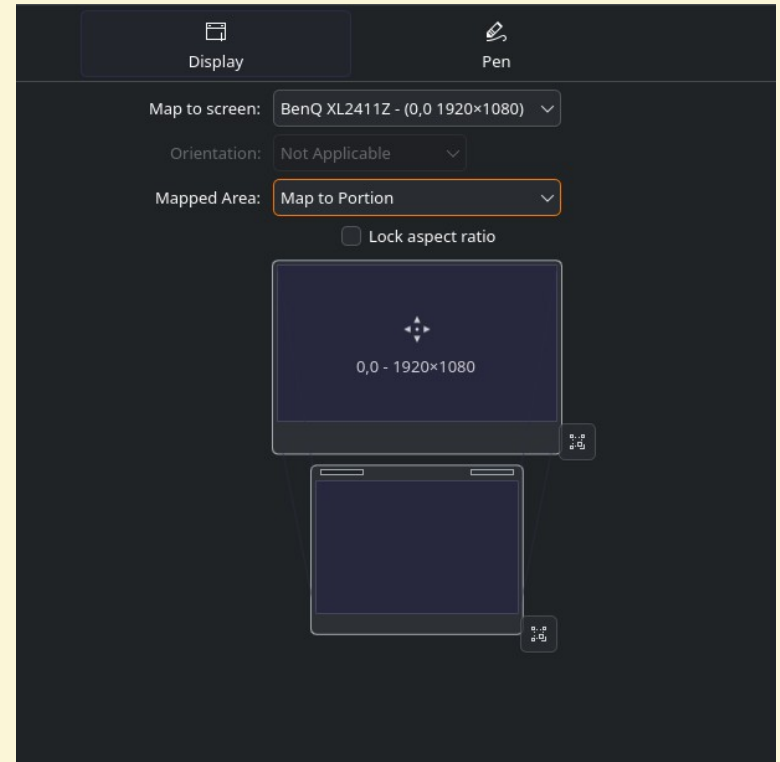

DRAWING TABLET

- Wayland support
- Shipped by default
- Tablet tester, calibration, CLI
- New design

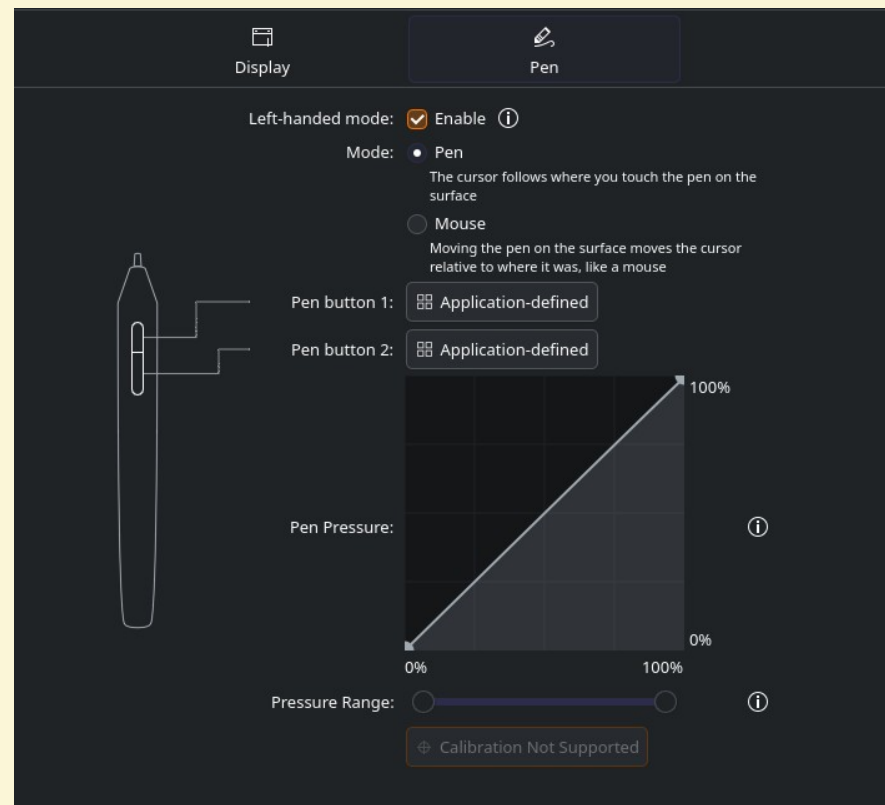

DRAWING TABLET

- Map tablet to screen
 - Entire screen
 - Regions
 - Input area
- Tablet orientation

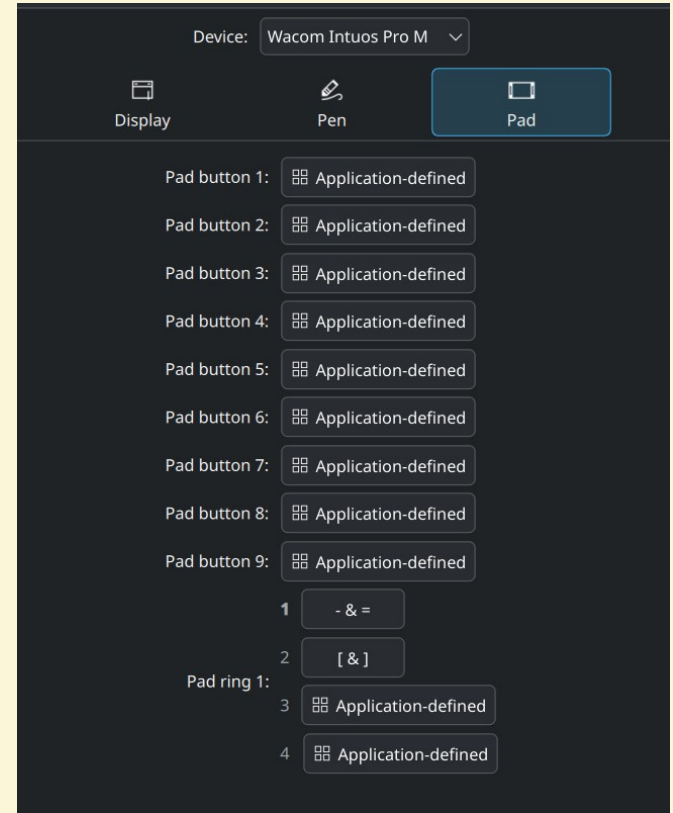

DRAWING TABLET

- Remap stylus buttons
- Stylus pressure curve & range
- Relative mode (Mouse mode)

DRAWING TABLET

- Remap pad buttons
- Remap pad rings

LEARN MORE

Bridging the Gap: Artists and Wayland

- Sunday, 17:10 to 17:50 CEST

[*https://artonwayland.redstrate.com/*](https://artonwayland.redstrate.com/)

[*https://nicolasfella.de/posts/qt-wayland-tablet-improvements/*](https://nicolasfella.de/posts/qt-wayland-tablet-improvements/)

MOUSE AND TOUCHPAD

Status:

In progress

Shoutout:

KWin team (DND fixes), taj-ny

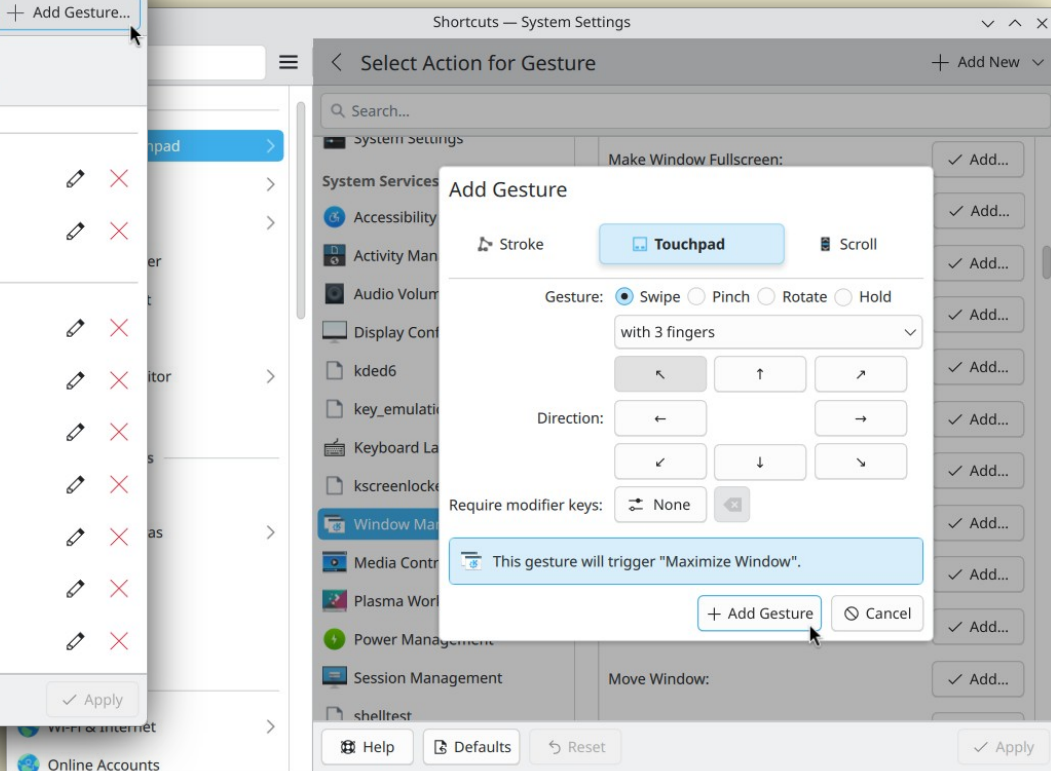

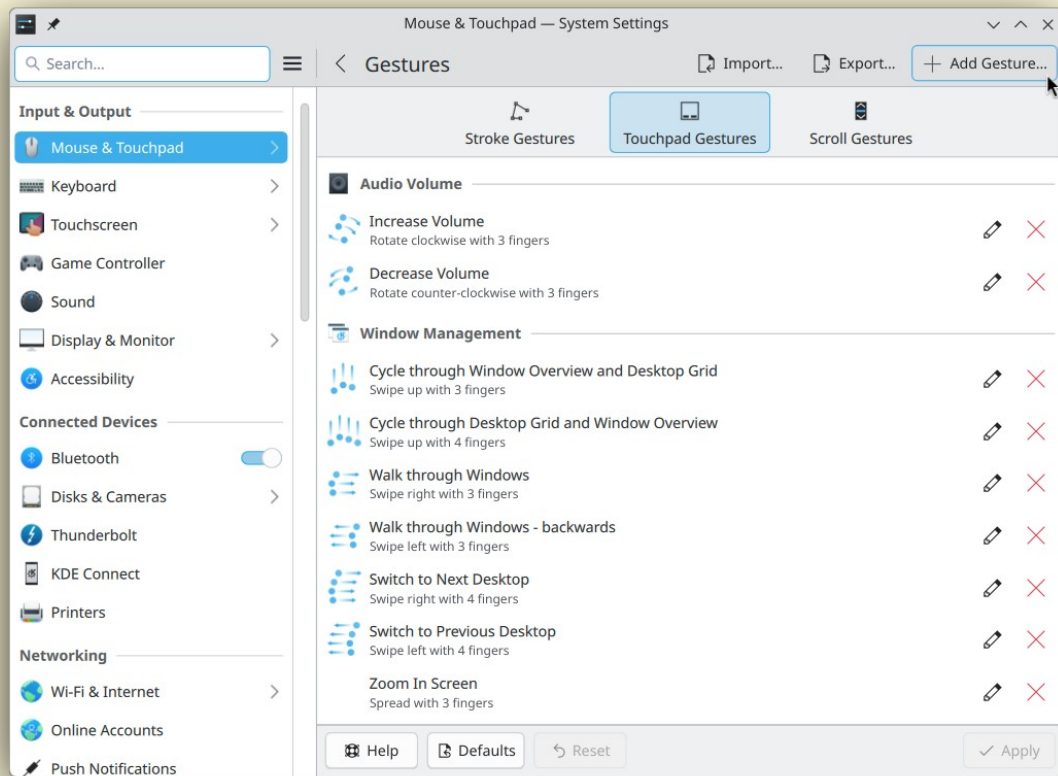

MOUSE AND TOUCHPAD

- Support missing libinput features
 - disable touchpad when mouse plugged in (*done*)
 - custom acceleration profiles (*pending*)
 - 3-finger drag (*pending*)
- Touchpad gesture customization
- ~~Mouse gestures~~ Stroke gestures
- Per-device mouse button rebinding

MOUSE AND TOUCHPAD – GESTURES

- Third-party KWin plugin [taj-ny/InputActions](#)
- NLnet grant applied, approved & ongoing
- Gestures mini-sprint UX design & architecture
- App-specific gesture shortcuts?

MOUSE AND TOUCHPAD – GESTURES PREVIEW

MOUSE AND TOUCHPAD - GESTURES PREVIEW

KEYBOARD

Status:

Many improvements merged

Shoutout:

*Christoph Wolk, Nicolas Fella,
Bharadwaj Raju, Evgeny Chesnokov,
Ismael Asensio*

KEYBOARD

DONE

- Keyboard-only navigation fixes
- Sticky Keys on Wayland
- MouseKeys on Wayland (move pointer w/ numpad keys)
- Keyboard settings port to QML

WIP

- Re-bind keys globally (e.g. "Copilot" key)

KEYBOARD – FUTURE WORK

- Slow Keys on Wayland
- Spare Layouts on Wayland
- Shortcuts to insert text snippets

VIRTUAL KEYBOARD

Status:

Getting ready for release

Shoutout:

Devin Lin, Aleix Pol

PLASMA KEYBOARD

- Built with Qt 6 and Qt Virtual Keyboard
- Layouts & autocomplete from upstream
- Waylandinput method protocol
- Mouse/touchpad support
- Customizable layouts and interactions
- Modifier keys

PLASMA KEYBOARD – FUTURE WORK

- Fixes & polish
- Manual hide & show
- Physical keyboard emulation layout
- Floating mode
- Emoji
- Swipe support

BETTER IME SUPPORT

(EXCL. ON-SCREEN KEYBOARD)

Status:

Contributions needed

Shoutout:

Xuetian Weng, Dorota C.

BETTER IME SUPPORT – GOALS

- **Select more than one input method** (e.g. Plasma Keyboard & fcitx5)
- **Unified settings for keyboard and input method**
- **input-method-v3 Wayland protocol** (MR !433 ff.)
- **Productionize one additional input method**
- **Speech to text / dictation / voice actions**

GAME CONTROLLERS

Status:

More contributions needed

Shoutout:

*Jeremy Whiting, Arthur Kasimov,
Oliver Beard, Joshua Goins,
Yelsin Sepulveda*

GAME CONTROLLERS – GOALS

- Pass controller events through KWin
 - Don't break games for users
- Inhibit sleep when controller is in use
- Remap buttons, calibrate deadzone
- Mouse emulation
- Handle quirks of Steam Controller
- Navigate Plasma with controller only

GAME CONTROLLERS - GSOC

- Stack: libev, uinput, Linux force feedback, inotify
- API viability verified
- No KWin integration yet

MISCELLANEOUS

- **Input Capture portal** (Shoutout: David Redondo)
- **Deskflow** (Shoutout: Chris Rizzitello)
- **Plasma Mobile, Plasma Bigscreen**
- **Improve use of input APIs in apps**
- **Something we may have missed entirely?**

THANK YOU!

Contribute

- File bug reports
- Fix your favorite apps & features
